DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because the word "using" should be added between the words "of" and "a" in line 1 of the Abstract. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Cormany (2,668,689).
4. In figures 13 and 14, Cormany discloses chassis (220) for supporting a power tong assembly for connecting and removing pipes to/from pipe strings, the assembly comprising an a power tong (78), a back-up tong (142), at least three columns (218) and a work area (between the tongs), wherein the power tong and back-up tong are movable relative to each other along the columns and discloses a method for removing a pipe length from a pipe string that inherently anticipates all of the claimed method steps disclosed in claims 3-6.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hauk (5,060,542) discloses a pipe tong apparatus that is intended to be used in a method for removing pipes from pipe strings that is very similar to the applicant's claimed invention.
